November 2021 Copper Basin Outages
4 Outages

- Operator error
- Equipment failure
- Unknown Cause
- Maintenance
August 2021 Copper Basin Outages
10 Outages

- Unknown Cause
- Construction
- CVEA caused

July 2021 Copper Basin Outages
7 Outages

- Animals/birds
- Construction
- Material or equipment fault/failure
CVEA experienced four outages caused by Allison Creek tripping off line. Upon extensive investigation it was found to be caused by an intermittent fiber optic cable used to communicate between the power house and the diversion structure in combination with a programming error which caused the unit to trip without any indication of doing so.
• High winds accounted for a number of outages on April 4 in the Copper Basin
• An equipment failure at the Cogen accounted for a partial system outage on April 13
